DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of invention shown in Fig. 11 in the reply filed on 5/18/2004 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "the filter" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3731

Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by YADAV et al. (6,391,044).

As to claims 1-2, YADAV (Fig. 14-15) shows elongate wire 164, filter membrane 170 having a distal portion and a proximal free end portion, deploying means/control mechanism/sleeve 180 as recited in the claims.

As to claim 3, YADAV (Fig. 21) shows filter membrane 260 having rounded sections.

As to claims 6-10, YADAV (Fig. 14-15) inherently discloses a method of using the filter device as recited in the claims.

As to claims 4-5, YADAV (col. 6, lines 3-5) discloses pore size of the filter membrane in a range of 20-300 microns.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over YADAV et al. (6,391,044).

As to claims 11-14, YADAV discloses substantially the structural limitations of the instant invention. YADAV does not explicitly disclose the device for use in an angioplasty procedure at location in a carotid vessel or a coronary vessel. However, the use of a vascular filter in an angioplasty procedure at a location in a carotid vessel or a coronary vessel is well known in the art to prevent a blockage/obstruction of a blood flow. It would have been obvious to one of

Art Unit: 3731

ordinary skill in the art at the time of the invention to use YADAV filter in a carotid vessel or a coronary vessel so as one can filter/trap small pieces/particles broken from a blood vessel wall during an angioplasty procedure to prevent a blockage/obstruction of a blood flow.
